DETAILED ACTION

Response to Amendment

1. The amendment filed 02-08-2010 has been entered.
2. Claims 1-2 are pending.
3. Acknowledgement is made of the amendments to the specification.
4. The replacement drawings sheets, namely sheets 1-3 and Figs. 1-6, filed 10-28-2009 are approved by the examiner.

Examiner's Amendment

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

In amended paragraph [0016], line 2, after "with" insert "--ring or--" and after "inner" insert "--ring or--";

In amended paragraph [0017], line 4, delete "(not shown)"; and

Amended paragraph [0017], line 7, change "cylinder wall 30" to "--inner ring 96--".

In the claims:

Claim 1, line 6, change "portion" to "--bag--".

(NOTE: The above changes to the specification and claims correct minor informalities only.)

Art Unit: 3677

6. The following is an examiner's statement of reasons for allowance: Regarding claim 1, the annular skirt must be defined by element 28 having an inner surface provided via portion 30, while the ring must be defined by element 96 as the ring is required to hold the bag against the inner surface of the skirt. The prior art of record fails to disclose or suggest the cover as claimed in detail, specifically a ring for snugly holding said bag against the inner surface of said skirt such that a first set of spikes of differing lengths protrudes inwards from the inner surface of said skirt, pointing towards a longitudinal axis of said skirt, and a second set of spikes protrudes inwards from an inner perimeter of said ring.

7. Regarding claim 2, the annular skirt must be defined by element 28, and the inner ring must be defined by element 30, such that the collar comprises elements 28 and 30, collectively, as now defined in the specification. Further, ring 96 is integrally connected to the inner ring 30, such that the second set of spikes can be claimed as projecting radially inwardly from the collar as the spikes project directly from the ring 96, which is part of the inner ring 30, which is in turn part of the collar. The prior art of record fails to disclose or suggest the method as claimed in detail, specifically the collar comprising an annular skirt and an inner ring such that a first set of spikes of different lengths project radially inwardly from the collar to engage the handle directly, and a second set of spikes projects radially inwardly from the collar to urge the bag against the handle.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3677
